

JS8Spotter MCForms for SitRepNet

KN4AM • Ver. 03/26/2026

▀ **Primary form.** These should always be kept current and available in Expect, with others optional.

⚙ **Keep this form listed in Expect**, but replace with “NTR” when form is not currently active.

Download all the latest forms from <https://sitrepnet.com/js8spotter-mcforms-repository> .

F!100 - Amateur Operator Information

10 Items covering your ham radio interests and activities.

F!101 - Amateur Station & Equipment Details

9 items describing your radio, antenna, power, modes, and grid-down capabilities.

F!102 - JS8Call Operation Details

6 items about how you use JS8, experience and comfort level, and bands

F!103 - Net Check-in

4 items for a basic, standard net check-in.

▀⚙ **F!104 - @SITREP Basic Check-in**

6 items for basic check-in and independent information sharing. Designed as a Top Level form that points to any currently active reports. For SitRepNet, this should be kept current and available in Expect. F!104 is designed for use with F104Mapper.

F!105 - Information Exchange Planning

5 text entry and 6 MC items to initiate information exchange during both normal times and in times of crisis. The focus here is on creating decentralized, independent connections.

F!106 - Impromptu Net Notice

2 text entry and 8 MC items to announce details of an impromptu net to address a specific event. It is not for routine scheduled nets. An “Impromptu Net” could be just 2 stations passing traffic.

F!107 - Request for Information

6 text entry and 3 MC items to request information and gather intelligence. This is used to analyze and compile reports and information bulletins that are sent out QST. It includes an expire date and a serial number to keep things organized and current.

F!108 - Station Schedule and Temporary Closing/Reopening Notification

NCS tool used to report station operating schedule, frequencies, and pending QRT. (KN4AM)

F!300 - Situation Report

12 items and 7 sub-forms reporting on post-disaster conditions.

F!301 - Field Situation Report

9 items. This covers all the basics in a quick, easy-to-use format.

F!302 - Hospital Bed Report

8 items reporting available hospital beds by specialty.

F!303 - Hospital Status Report

10 items reporting on the infrastructure required to keep a hospital operational.

🌐 F!304 - Individual Situation Report

8 items reporting on current infrastructure conditions at your location.

F!305 - Early Warning Awareness/Alert Report

4 items and 4 text entry fields. Early Warning Awareness/Alert for an anticipated event in which net activation, further communications, or preparedness actions may be called for, along with net and other followup information.

F!306 - Power Stability Report

1 item reporting on electrical power stability at your location over the last 48 hours, plus 1 item on your station backup power capability.

F!307 - Wildfire Status Report

2 text entries and 7 MC items to report the status of a wildfire.

F!308 - Open Source Information Report

4 text entries and 4 MC items to report open source information for news bulletins.

🌐 F!500 - Local Supply Survey

15 items used to gauge availability of supplies and level of consumer anxiety.

F!504 - Comprehensive Weather Report

18 items for a comprehensive report on weather conditions, suitable for advanced weather forecasting. This is intended for weather forecasting by casual and serious WX hobbyists or a “crowd sourced” weather service. Focus is on basic instruments (thermometer, rain gauge, barometer, sling psychrometer) and visual observation to make it usable by the largest number of observers. Many will not be able to report on all items – report what you can, and leave the rest blank. Supporting docs on this website provide guidance for visual observation. [KN4AM]

🌐 F!505 - Area Assessment

32 items for a very detailed assessment of an area. F!505 is designed for use with JS8Reporter.

F!700 - 4SQRP Net Checkin

6 items used for low power JS8 nets.

F!701 - MAGNET Information & Observation Report

6 items and 3 optional sub-forms to report observations and information.

F!702 - SEEN Operator Station & Equipment Details

9 items to report station and equipment details. Used to assess capabilities in both grid-down and “normal” operating environments.

F!702A - SEEN Net Check-in

3 items for net check-in.

F!703 - COOP 9 Line Medivac Reporting Form

10 items for requesting medical evacuation in a war zone or similar situation [COOP].
